

Functional Anterior Esthetics for the Interdisciplinary Minded Dentist and Lab Technician

By Dr Edward and Mr Nelson

Program description

This program will provide you with the essential tools and a system to begin assessing patients who come to your office demanding cosmetic and esthetic services. Know which patients to select as simple and conservative veneer cases and which patients qualify as more comprehensive oral rehabilitation cases.

Learning objectives

1. Learn a systematic approach to planning any anterior case, simple or complex
2. Utilizing Digital technology to predictably plan and manage restorative cases
3. Develop an understanding of what is a no prep vs. prepped veneer case
4. Enhance your knowledge of tooth and gingival esthetics
5. Update your comprehension of dental materials for esthetic cases
6. How to occlusally equibrate a case post insertion
